Education

University of Maryland, College Park, MD

August 2023 - Present

- Major: Computer Science | Minors: Data Science and Science, Technology, Ethics, and Policy (STEP)
- Courses: Human-Computer Interaction, Programming Handheld Systems, Data Visualization, Data Ethics, Python for Data Science, R for Data Science, Compilers, Web Application Development, MATLAB, Algorithms, Organization of Programming Languages, Discrete Structures, Computer Systems, Object-Oriented Programming I and II

Work Experience

SIP (Summer Intern Program) Intern

May 2026 - August 2026

National Center for Advancing Translational Sciences (NCATS-NIH)

- Built an automated QC pipeline for the Rare Disease Alert System with Natural Language ToolKit (NLTK) and Mistral LLM to validate disease-article matches across 15k database entries, achieving high success rates.
- Conducted comparative performance evaluations across various open-source LLM models to determine optimal parameters and integrate the best-fit model for the project.
- Worked with 5,000,000+ PubMed articles and 15k+ rare diseases, merging to a database of almost 600k rows of disease-article matches.

Senior Intern

May 2025 - July 2025

Washington Software

- Collaborated with a team of 5 to build an automated, AI-driven course-creation platform.
- Developed an IT Slides Tutor with OpenAI's custom GPT builder and n8n automation software.
- Led intern meetings and mentored 10 interns through individual technical projects.
- Managed the intern Jira board and Microsoft Teams chat to track project progress and deliverables.

Personal Projects

Memory Anchor

April 2026

UMD Bitcamp Hackathon Project

- Integrated Gemini API to analyze video frames and generate memory content.
- A day-to-day memory tool for dementia patients with a curb cut for the general audience. Patients would wear a camera that records their activity. When memory has faded, they can ask what they were doing, and the API would generate text, audio, and captioned images to help the user remember.

Automated Slides Generator

May 2025 - July 2025

Washington Software

- Built an automated slideshow and speaker notes generation pipeline consisting of automation software and a custom GPT.
- Designed an AI Slides Tutor that generates learning content based on user topic, background knowledge, and learning goals.

Skills

- Programming Languages: Java, JavaScript, SQL, Python, Assembly, HTML, R, OCaml, and C
- Tools: Visual Studio Code, MySQL Database, Android Studio, React, GitHub, Eclipse, n8n, OpenAI, and Unity
- Design: Figma, Aseprite, ibisPaint X, and Canva
- Languages: English, Mandarin Chinese, and Taiwanese

Achievements

- Year 2026: First Place in NCATS Rigor Icons Contest, UMD Academic Honors (Dean's List) Spring 2026
- Year 2025: UMD Academic Honors (Dean's List) Spring 2025 and Fall 2025
- Year 2024: Nominee for UMD 2024 Office of Multi-ethnic Student Education Academy of Academic Excellence
- Year 2023: Academic Honors (Dean's List) Fall 2023, National Honors Society, Chinese Honors Society, Maryland Seal of Biliteracy, Certificate of Meritorious Service for 240+ documented SSL hours
